

The Benefits of Becoming a National Liner Installer

National Liner, LLC is a network of certified CIPP installers throughout the United States and Canada. Arming contractors with the highest quality materials that meet or exceed ASTM standards, National Liner provides the CIPP products, innovation and ongoing support that qualified installers trust. Since 1992 National Liner's partner contractors have installed nearly 30 million feet of CIPP liner, providing system owners with high performing rehabilitated pipes that last for decades.

Why should you become a National Liner installer?

- Approval in most major markets
- Product Submittal Packages ready to go for all CIPP products
- Marketing and sales support/national exposure
- Tradeshow exhibits at WEFTEC, No-Dig and UCT
- NASSCO, NASTT, WEF & ASTM representation
- Extensive research and development
- Pressure pipe relining data and support
- Water pipe relining development
- Negotiation of all raw material costs (resin, catalyst and felt liner)
- Updated resin and catalyst pricing (quarterly)
- Several approved resin suppliers
- Several approved felt suppliers
- National Liner also supplies scents, pre-liners, pigments, patch material and THF

Additionally, all National Liner licensees benefit from the group's extensive wet-out and install experience, and information regarding any new wet-out or field products, technologies, or techniques are passed on to all licensees. All National Liner licensees also benefit from the group's combined installation (two million linear feet annually), and cumulative group footage installed (30 Million). In addition, Scott Roth's 16 years of experience with wet-out operations, wet-out equipment, and over the hole wet-outs is available to you and your specific job requirements when you need personal support.
